Every year in the January issue, in print and online, *Choice* publishes a list of Outstanding Academic Titles that were reviewed during the previous calendar year. This prestigious list reflects the best in scholarly titles reviewed by *Choice* and brings with it the extraordinary recognition of the academic library community.

The list is quite selective: it contains approximately ten percent of some 6,000 works reviewed in *Choice* each year. *Choice* editors base their selections on the reviewer's evaluation of the work, the editor's knowledge of the field, and the reviewer's record. The list was known as Outstanding Academic Books until 2000. The new name reflects an increase in reviews of electronic products and Internet sites.

In awarding Outstanding Academic Titles, the editors apply several criteria to reviewed titles:

- overall excellence in presentation and scholarship
- importance relative to other literature in the field
- distinction as a first treatment of a given subject in book or electronic form
- originality or uniqueness of treatment
- value to undergraduate students
- importance in building undergraduate library collections

The feature list cites only bibliographic information. The number and publication issue of the *Choice* review are also provided, to assist readers wishing detailed evaluations of the titles. In addition, *Choice Reviews* (<http://choicereviews.org/>) tags all reviews that have been designated as Outstanding Academic Titles.
